Subject: Re: California Resources Carbon Sequestration/EOR Project Follow-up

Ken,

We can provide contacts for 45Q but don't believe we will be involved in confirmation of calculations.

Mr. Stoker,

It was a pleasure meeting you last week at Elk Hills. CRC appreciates the opportunity to showcase our Elk Hills operation and preview our CCS/EOR project. Below are a few bullet requests that would be very helpful to quantifying the value of our project and clarifying the regulatory pathway to execution.

- Suggest a primary contact on the 45Q Carbon Credit program
 1. Confirmation of our calculations of the credit value for our project
 2. Clarification of the application process and requirements/documentation to qualify for the program
- Confirmation of our understanding that the project falls under EPA Class II injection permitting
- Clarification on how the EPA, and other federal agencies, would be involved in the project's regulatory and approval path.

Thanks again for your support.
